

UTKARSH MISHRA

Data Analyst — Automating Processes & Driving Data-Driven Decisions

Email: harshutkarshmishra1998@gmail.com | Mobile: +91-8957946660

LinkedIn: [linkedin.com/in/harshutkarshmishra](https://www.linkedin.com/in/harshutkarshmishra) | Location: Gurugram, Haryana

PROFESSIONAL SUMMARY

Data Analyst with **2 years of experience** in data analytics, visualization, and automation. Proficient in **SQL, Python, Tableau, AWS, and Advanced Excel Functions**. Demonstrated success in optimizing resource allocation and operational efficiency through data-driven insights and advanced analytics.

SKILLS

- **Data Preprocessing & Analytics:** SQL, Python (Pandas, NumPy, Matplotlib, etc.), Statistics
- **Data Visualization & Reporting:** Tableau, MS Excel (Advanced Formulas, Power Pivot, Power Query, VBA, Macros, etc.), MS PowerPoint
- **Cloud Technologies & ETL Automation:** AWS (S3, Lambda, Glue, RDS, Redshift, Kinesis, Athena, etc.), PySpark, Hadoop, Hive, Data Pipelining
- **Data Science:** Predictive Modeling & Forecasting, Machine Learning (Regression, K-Means, KNN, SVM, Naive Bayes, Decision Tree, Random Forest, etc.)

WORK EXPERIENCE

Incedo Inc.

Data Analyst

Gurugram, Haryana

July 2023 – Present (2 years)

Project: Anti Money Laundering & Fraud Detection Model - PNC Bank

- **Streamlined Database Management:** Curated and aligned 6000 columns across 50 tables to meet the requirements of a new AML/Fraud Detection Model, leveraging scripts to identify and resolve data patterns.
- **Maintained Regulatory Compliance:** Collaborated with security and compliance teams to ensure compliant data handling by encrypting or removing sensitive customer data and restricting its use in internal projects without proper authorization.

Project: People Supply Chain & Resource Management Group - McKinsey & Company

- **Enhanced Operational Efficiency:** Automated the People Supply Chain (PSC) Scorecard to track 28 KPIs, which helped increase campus batch utilization and reduce Bench + Buffer by 3%.
- **Optimized Resource Allocation:** Analyzed and resolved inefficiencies across 10 customer accounts using RMG Pyramid reports, improving allocation ratios.
- **Streamlined Internal Fulfillment:** Automated IFF Reports, reducing refresh time from 24 hours to 4 hours and improving real-time tracking and resource utilization.
- **Balanced Leadership Ratios:** Developed data models to address employee-to-manager ratio discrepancies, reducing problematic projects from 74 to 32.
- **Boosted Resource Productivity:** Implemented a People Level Utilization report, providing insights that improved individual productivity and optimized resource management.
- **Enhanced Financial Oversight:** Led the development of a P&L reporting system, integrating predictive models to forecast Revenue/FTE and Cost/FTE trends, enabling proactive margin optimization and improved financial planning.

EDUCATION

Maulana Azad National Institute of Technology (NIT Bhopal)

Bachelor of Technology (B.Tech.)

Bhopal, Madhya Pradesh

2019 - 2023

PERSONAL PROJECTS

- **Employees' Absenteeism Analysis:** Cleaned and analyzed absenteeism data using SQL, Python, and Tableau. Built a logistic regression model to forecast trends, optimizing workforce planning.
- **Volkswagen Market Analysis:** Conducted comprehensive data analysis and pre-processing on Volkswagen's market data, incorporating competitor indices and key industry events. Built a predictive model using SARIMAX to forecast market returns, considering volatility from acquisitions, scandals, and global events.
